About Me

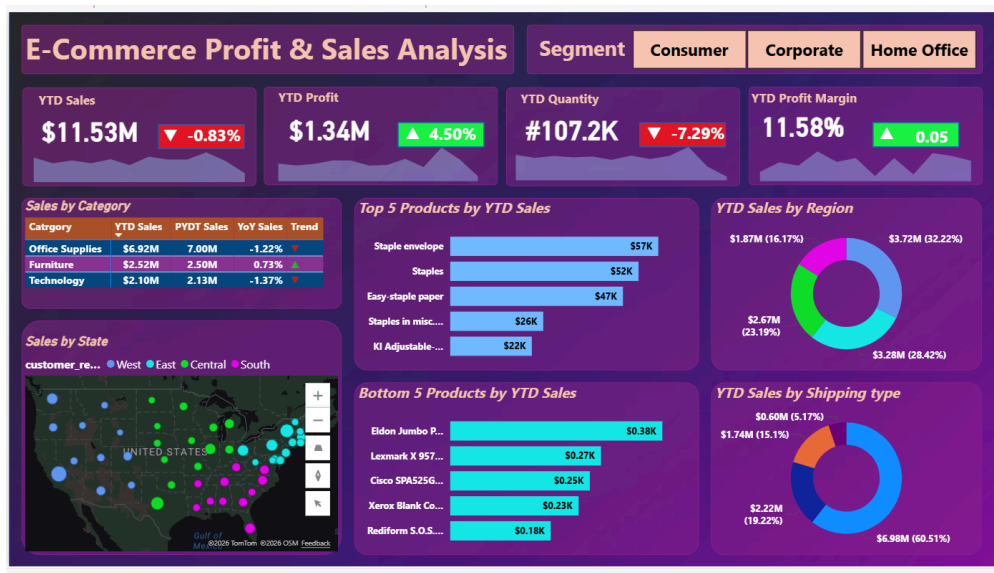

Results-driven Data Analyst with expertise in SQL, Python, Excel, and Power BI. Passionate about transforming complex datasets into meaningful insights through data analysis, visualization, and business intelligence solutions.

Technical Skills

MySQL	Python	Power BI
Excel	Pandas	NumPy
Matplotlib	Power Query	Git

Projects

E-Commerce Profit & Sales Analysis Dashboard

Built an interactive Power BI dashboard analyzing over 113,000 orders. Reduced manual reporting effort by 75% through automation and visualization.

Performed category, regional, and state-level analysis to identify demand patterns and business opportunities.

Evaluated shipping modes and product performance to uncover optimization opportunities and improve decision-making.
